

## Dispersant

### RD-9516

#### Characteristics and advantages:

Product RD-9516 is a universal dispersant launched by our company for PU color pastes. It does not belong to the alkyl phenol type of surfactants. It can show excellent grinding and dispersion performance for alkaline surface carbon black, increase the addition amount of color powder in the color paste/color paste formula, and still has low viscosity, good fluidity and storage stability.

#### Product parameters:

Appearance	Transparent liquid
Valid copy	98±2%
Chroma (Gardner)	< 7
Density	1.05g/cm

#### Recommended dosage:

Types of pigments	Carbon black
Dosage of dispersant (100% active content)	10—30%

#### Usage method:

First, dissolve RD-9516 in the mixture of the grinding base material, and then add the pigment for grinding.

#### Packaging:

Net weight 25Kg/ drum, 200Kg/drum.

#### Storage

1. Keep away from high temperatures and fire sources, and store in a well-ventilated and cool place.
2. Please seal after use.
3. Shelf life: 12 months.
