

Levelling agent

RF-7320

Features and advantages:

RF-7320 is a silicone surface additive for solvent-based coating systems that slightly reduces surface tension and smoothness.

1. Slightly reduce the surface tension of the coating system
2. Very good thermal stability
3. It has defoaming effect
4. Help the orientation of matting powder and aluminum powder

Product parameter:

| | |
|----------------------|--------------------------|
| Appearance | Transparent liquid |
| Effective portion | 100% |
| Chemical composition | Organosiloxane copolymer |

Application field:

Solvent-based system varnishes and paints

Recommended dosage:

Total formula in the form of supply: 0.05-0.4%

use:

Pre-dilute or add directly as supplied

Packing:

25KG non-recycled blue plastic drum. The product is not completely used before, and the lid should be tightened after use.

Storage:

Stored in unopened original packaging for use within 12 months from the date of production.
