

## Polyester leveling agent

### RF-7511

#### Features and advantages:

This leveling agent is a silicone-free retreatable leveling agent, which has excellent compatibility with the resin system. It promotes the coating system to have good flow control and leveling characteristics, effectively preventing the occurrence of coating defects such as craters, pinholes, and fisheyes. There is no interlayer adhesion problem, and it has excellent recoatability.

#### Product parameters:

Appearance	Light yellow liquid
Composition	Polyester compounds
Density	1.02 g/cm
Flash point	82 °C
Solid content	100%

#### Application scope:

Suitable for all oil-based coating systems

#### Recommended dosage:

The addition amount is 0.5%-3.0% of the total formula, and the optimal addition amount is 1.0% - 2.0%.

#### Usage method:

It can be added at any stage of production.

#### Packaging:

25Kg per drum, 200kg per drum.
