

Anti-graffiti agent

RT-3136

Features and advantages:

RT-3136 reactive silicone for industrial paint and leather coating, has excellent reaction performance, good leveling, miscibility, drop Angle greater than 100, excellent hydrophobic oil, low friction coefficient, long-lasting smooth feel, whiteboard pen easy to wipe. It also has a good soft effect and breathable effect in leather.

- Excellent reactivity
- Solvent-free
- Soft and breathable effect
- Extra smooth feel

Product specification:

Appearance	Transparent liquid
Effective portion	100%
Chemical composition	Organosiloxane copolymer

Application field:

Polyurethane/acrylic resin/isocyanate and polyester/isocyanate two-component system

Recommended dosage:

Total formula in supply form: 2.0-20.0%

Packing:

25kg/200kg

Storage:

Store in unopened original packaging for use within 12 months
