

Anti-graffiti additive

RT-3150

Features and advantages:

RT-3150 reactive silicone for industrial paint and leather coating, has excellent reaction performance, good leveling, miscibility, excellent water and oil repellent, low friction coefficient, long-lasting smooth feel, markers, whiteboard pens easy to wipe. It also has a good soft effect and breathable effect in leather.

1. Excellent reactivity
2. Solvent-free, higher compatibility
3. Soft and breathable effect
4. With extra smooth feel

Product parameter:

Appearance	Light yellow transparent liquid
Effective portion	100%
Chemical composition	Organosiloxane copolymer

Application field:

Polyurethane/acrylic resin/polyester/isocyanate two-component system

Recommended dosage:

Total formula in supply form: 2.0-20.0%

How to use:

Either pre-diluted or directly added to the paint in the supplied form can be pre-diluted with the recommended solvent for easy addition and mixing

Packing:

25KG, plastic drum;

Storage:

Store in unopened original packaging for use within 12 months
