

Dispersant

RD-9766

Features and advantages:

RD-9766 is a general purpose polymer dispersant, inorganic pigments (titanium dioxide and iron oxide) and fillers in solvent based (including uv) coating systems, especially for the anti-hard settling of fillers. At the same time, it can reduce grinding time, improve gloss, prevent floating color and hair problems, environmental protection does not contain apeo.

Product parameter:

Appearance	Yellow viscous liquid
Active ingredient	98±2%
Specific gravity	1.03-1.08g/cm ³
Chroma (Gardner)	≤8

Application scope:

1. Preparation of inorganic pigments and filler concentrates in oil-based coating systems;
2. Disperse iron oxide, barium sulfate and other inorganic pigment fillers in the oil-based coating system.

Recommended addition:

Inorganic pigment	0.5—5.0%
-------------------	----------

Usage:

First dissolve RD-9766 in the mixture of grinding base material, and then add pigment for grinding.

Packing:

Net weight 25Kg/ barrel, 200Kg/barrel.

Storage:

Keep away from high temperature and fire sources; Place in a cool and ventilated place; Seal after use; The shelf life is 36 months.
