

## Dispersant

### RD-99031

#### Features and advantages:

RD-99031 is a non-ionic wetting dispersant, mainly used for pigment wetting. When used as an auxiliary dispersant, it has excellent coloring strength and viscosity reduction effect. Dispersing carbon black can improve the addition amount, blackness and long-term stability.

- High blackness
- Long-term stability of carbon black
- Solvent free, no labe

#### Product specification:

Appearance	Clear to slightly cloudy liquid
Active ingredient	35%
Solvent	Water
Chemical composition	Aqueous solutions of polymers and surface active substances containing high pigment affinity groups
PH value	8.5
Solubility	Water, ethanol

#### Application:

Rinting ink, General industrial paint, Pigment pulp concentrate

#### Recommended Dosage:

For resin-free grinding, based on the supply form of abrasive added: 20.0-40.0% :  
1.0-5.0%

**Usage:**

First added in the grinding stage, and then dispersed.

**Packing:**

Net weight 25Kg/ barrel, 200kg/ barrel.

**Storage and precautions:**

When stored in an unopened package between 4°C and 40°C, the product has a shelf life of at least 12 months from the date of production.
