

Defoamer

RP-6308

Features and advantages:

RP-6308 is a non silicone defoamer with high cost-effectiveness. It is suitable for improving the flowability of solvent based and non solvent based coatings, and has strong anti foaming, defoaming, and defoaming effects. It is particularly suitable for high viscosity coating ink systems. At the same time, it has good compatibility, is not prone to shrinkage in the system, and has safe performance.

Product parameters:

Appearance	Light yellow viscous liquid
Effective copies	100%
Component	Acrylic ester copolymer

Application fields:

Used for two-component PU, amino baking paint, nitro immersion coating, acid cured amino, epoxy and other solvent free systems.

Recommended dosage:

Please test the optimal dosage for a total amount of 0.1-2.0%;

Usage:

After addition, it should be mixed under sufficiently high shear force. It is recommended to add before grinding.

Packing:

25kg iron/rubber drum
